RED CENTRE INDULGENCE

**SYDNEY - LOUTH (TRILBY STATION) - LONGREACH -
BIRDSVILLE - ULURU - WILLIAM CREEK -

DAY 1

SYDNEY - LOUTH

Our crew welcome you at Bankstown Airport (Sydney) before departing on this exciting Outback adventure. Take in the views from a completely different perspective. Our Cessna Grand Caravan's high wings and oversized windows are perfect for "flight seeing".

We fly northwest to the Outback town of Bourke, where we visit the Back O' Bourke Exhibition Centre. Set amongst a native garden of river red gums on the banks of the mighty Darling River, this modern museum showcases the fascinating local wool and riverboat history of the region.

"If you know Bourke, you know Australia" - Henry Lawson

After lunch we track the Darling to the bush town of Louth. A dirt road leads us to Trilby Station, a family owned 320,000 acre sheep property. This overnight stay focuses on offering the true Australian Outback station experience. The Murray Family has lived in the area for seven generations, grazing merino sheep since 1860, and a glimpse into their way of life is not often accessible to outsiders. Our host, Liz, will take guests on a walking tour of the state-of-the-art shearing shed and aircraft hangar, while giving us an overview of life on a remote sheep station.

Immerse yourself in the landscape, appreciating a bush sunset with drinks and canapés by the billabong.

BIRDSVILLE - ULURU

Foxtrot Tango Tango flies us across the Simpson Desert to the spiritual heart of Australia, Uluru. "The Rock" which was formed over 350 million years ago was once covered by sea.

"Around 500 million years ago the whole area was covered in sea. Sand and mud fell to the bottom and covered the seabed, including these fans. The weight of the new seabed turned the fans into rock. The sandy fan became sandstone (Uluru) while the rocky fan became conglomerate rock (Kata Tjuta).

400 million years ago the sea disappeared. The rocks folded and tilted as the earth's tectonic plates shifted. Kata Tjuta tilted slightly and Uluru tilted 90 degrees. Over the last 300 million years, the softer rocks eroded away, leaving the spectacular forms of Uluru and Kata Tjuta behind." - *Source: Parks Australia*

Get set for an evening of delight with the breathtaking Sounds of Silence Dinner experience. Admire the ever changing colour of the rock as the sun sets. Indulging in canapes and sparkling wine overlooking spectacular Uluru-Kata Tjuta National Park, this evening will be one to remember.
